About Me

Junior backend developer in continuous training, with a strong foundation in Python and SQL, complemented by Java and Spring Boot. My experience as a Financial Planning Analyst includes data automation and ETL processes, applying backend development principles. Passionate about building reliable APIs and scalable systems, I seek to apply my skills and contribute to a development team, solving problems with efficient code and continuously learning.

Professional Experience

Financial Analyst

Suramericana S.A | 2023 - Present

- Developed automation scripts in Python and SQL to streamline financial reporting.
- Created and maintained an ABC cost model using Python for internal service pricing.
- Participated in ETL processes and data cleaning for dashboarding and internal tools.
- Applied backend principles to automate repetitive business operations.

Data Analyst

Aceros Turia. | 2022 - 2023

- Extracted and transformed HR and operational data using SQL.
- Maintained internal databases and ensured data quality across departments.
- Built dashboards to visualize key performance indicators.

Education
